ST-CS-J8	8.0" Jumbo Straw – Unwrapped	6,000	100/60 <i>special order</i>

Biodegradable and compostable straws are made from PLA, a biodegradable resin made from corn starch. PLA resin is certified for biodegradability and compostability, under ASTM D6400-99 the North American standard for "compostable plastics".

Please note that composting is required for biodegradation. These compostable straws will completely biodegrade within 90-180 days in a commercial composting facility, but can take up to a year to biodegrade in a home composting system.

Compostable 100% POST CONSUMER PAPER HOT CUP SLEEVES

ITEM #	DESCRIPTION	CASE	INNER PACKS
SL-PA-ME	8 oz Paper Sleeves - 100% PCW	1000	20/50
SL-PA-LG	10-20 oz Paper Sleeves - 100% PCW	1000	10/100

Custom Printing is available.

These paper cup sleeves are made from post-consumer waste recycled paper.

Producing recycled paper causes 74 percent less air pollution, 35 percent less water pollution, and creates 5 times the number of jobs than producing paper from trees. It saves old-growth trees, forest eco-systems, native habitat and biodiversity.

Compostable 100% POST CONSUMER

Multifold Towels and Lunch/Dinner Napkins

We are proud to announce our very own line of unbleached 100% PCW (post-consumer waste) recycled paper napkins and paper towels. These products are not made from virgin paper nor do they come from post industrial processes--they are made from 100% post-consumer waste recycled paper. This means they come directly from a recycling waste stream and are not put through any bleaching process that might contain chlorine or any other chemicals. They perform just as great as virgin paper without the guilt-- these items are ideal for your next picnic, in your home or even large busy corporate offices.

ITEM #	DESCRIPTION	CASE	INNER PACKS
